INTRODUCTORY COMMENTS

Sir:

Applicants request a refund for the multiple dependent fee charged to deposit account 502464. The fee was levied against claim 15 the preamble of which, as originally filed, read as follows:

15. Method for dynamically optimizing data throughput according to the preceding claim, characterized in that said first and second weight functions assume the following expressions:

Accordingly, claim 15 depended upon "the preceding claim", namely claim 14. Therefore, claim 15 is not a multiple dependent claim and the aforementioned charge is in error. Claim 15 has been amended below to better conform with USPTO practice.

Prior to examination upon the merits, the following preliminary amendment is submitted in connection with the above identified patent application. It is respectfully requested that the present amendment to the claims be entered and considered by the Examiner.
